

Strong Points

Why **rely** on FlashStart solutions?

Stable global Anycast network (uptime 99.87%) and ultra fast (top five DNS resolvers in the world).

Cloud-level protection with maximum blacklist and whitelist customization.

Analysis of 40.000 new domains which are created every day, **using A.I.** with a predictive capability of > 92.5%.

Differentiating filters for users, groups, machines, and schedules with instant changes.

Filtering malware and **unwanted contents** in browsing, before they are downloaded to the network.

Easy installation with any router or firewall, cannot be disabled by workers or students.

A priority security of the whole network, including WiFi and IOT connected devices.

Extremely affordable prices by user type with no additional fees.

Network also **protected from DDOS attacks** or blacklisting due to reputation loss of public IPs.

Technological and business support **for partners**, with multilingual chat experts.

Why **rely** on FlashStart solutions?

Web cataloging with integrated machine learning from government blacklists and reporting of high-risk sites.

Multi-tenant **dashboard for centralized management** that can be integrated with **Active Directory**

90% of active sites are already classified into **eighty-five categories** that can be used as **blacklists**.

Detailed **historical or real-time reports** for instant detection of problems.

DNS level blocking, including malicious external links (phishing).

No costs for software, hardware, or upgrades of networked devices.

Optional **protection for remote connections** of workers and students and for browser search results.

Sales only through area partners for the best on-site support.

Exclusive, geographically based, total browsing block for high-risk countries.

Regulatory compliance and approval for professional internet protection requests.

Functions / Technical features

flashstart.com
info@flashstart.com

Malware Protection

Navigation security from malware, ransomware, botnet, phishing...

IP protection from blacklists

Upkeep of public IPs out of global blacklists.

DNS Intelligence on contents

Parental control and personalized web filtering for households, schools, organizations and companies.

Detailed analytics

Analytic reports in real time, by visited category and macro category, and scheduled via email.

Blacklists based on A-I

Over 90 categories continuously updated through Artificial Intelligence.

Maximum compatibility

Possibility to connect it to every Router, WiFi HotSpot, Firewall and Gateway. Support for static IP, dynamic IP (IPV4, IPV6) and DNS protocol.

Local Cache DNS

Optional DNS Proxy that can be added to the ISP net to further reduce the resolution latency.

Research engine filtering

Block of explicit contents (violence, porn...) that can be activated for searches on Google, Bing, YouTube and DuckDuckGo.

Geoblocking

Block of navigation towards countries at risk of hacker attacks and cyber threats.

Maximum global experience

Appreciated for more than 10 years by Internet Service Provider in 150 countries.
